Information on Regulation (EU) 2025/40 on Packaging and Packaging Waste

Dear Sir or Madam,

The new European Packaging and Packaging Waste Regulation (PPWR) introduces extensive requirements for packaging, as well as corresponding information and documentation obligations. We have thoroughly prepared for the relevant requirements, integrated them into our processes and established appropriate workflows.

As a manufacturer and distributor of water analysis products, we hereby confirm that, to the best of our current knowledge and based on the information provided to us by our suppliers, the packaging and packaging materials we deliver as of **12.08.2026** comply with the applicable requirements of the European Packaging and Packaging Waste Regulation (PPWR).

1. Compliance with the Packaging and Packaging Waste Regulation (PPWR)

The packaging we use and distribute complies, at the time of delivery, with the applicable requirements of Regulation (EU) 2025/40 on packaging and packaging waste. When selecting and using our packaging, we take particular care to adhere to the principles of packaging minimization, the avoidance of unnecessary packaging components, efficient use of materials, the recyclability of the materials used, and the applicable labeling and information requirements.

2. PFAS Compliance

Based on the information currently available to us, the packaging, packaging materials, and labels we use do not contain any intentionally added per- and polyfluoroalkyl substances (PFAS) that are subject to the restrictions or limit values specified in the PPWR. Pursuant to Article 5(5), these limit values apply exclusively to packaging in the food sector.

Tintometer GmbH • Lovibond® Water Testing • P.O. Box 41 03 84 • 44273 Dortmund • Germany

3. SVHC Compliance under the REACH Regulation

In accordance with Article 33 of the REACH Regulation (EC) No. 1907/2006, we continue to fulfil our obligation to provide information on articles containing more than 0.1 % (w/w) of SVHC substances.

This assessment is based on our current state of knowledge as well as on the information and evidence provided to us by our suppliers and sub-suppliers. The collection of individual detailed evidence and the compilation of the required technical documentation have not yet been fully completed.

We are in close communication with our business partners and are continuously working to further complete and validate the relevant information and evidence.

Sincerely,

Tintometer GmbH
