Regolamento (UE) 2025/40 / *Regulation (EU) 2025/40*

La presente checklist costituisce la pagina iniziale del Fascicolo Tecnico PPWR e identifica la documentazione disponibile e valutata a supporto della verifica dei requisiti applicabili all'imballaggio.
This checklist constitutes the first page of the PPWR Technical File and identifies the documentation available and reviewed to support verification of the requirements applicable to the packaging.

1. IDENTIFICAZIONE / *IDENTIFICATION*

Codice prodotto Giorgio Bormac ***Giorgio Bormac product code***	51300003-51300013-51300023-51300033
Descrizione prodotto ***Product description***	Bottiglia in HDPE 250 ml + etichetta
Tipologia di imballaggio ***Packaging type***	■ Prodotto / *Product* ☐ Spedizione esterno / *Outer shipping* ☐ Spedizione interno / *Inner shipping*
Data aggiornamento fascicolo ***Technical file update date***	03.09.2026

2. DOCUMENTAZIONE PRESENTE NEL FASCICOLO / *DOCUMENTATION INCLUDED IN THE TECHNICAL FILE*

Documentazione / Evidenza ***Documentation / Evidence***	**Presente** ***Available***	**N.A.** ***N.A.***	**Riferimento documento / Note** ***Document reference / Notes***
Dichiarazione PPWR del fornitore / fabbricante *PPWR declaration from supplier / manufacturer*	☑	☐	
Scheda tecnica / specifica tecnica dell'imballaggio *Packaging technical datasheet / technical specification*	☑	☐	
Informazioni su composizione, materiali, peso e dimensioni *Information on composition, materials, weight and dimensions*	☑	☐	
Dichiarazioni / evidenze relative a sostanze soggette a restrizione (es. metalli pesanti, PFAS ove applicabili) *Declarations / evidence concerning restricted substances (e.g. heavy metals, PFAS where applicable)*	☑	☐	
Informazioni / evidenze relative al contenuto di materiale riciclato, se applicabile	☑	☐	

Information / evidence concerning recycled content, where applicable			
Informazioni / evidenze relative alla riciclabilità *Information / evidence concerning recyclability*	☑	☐	
Rapporti di prova / analisi di laboratorio, se disponibili *Test reports / laboratory analyses, if available*	☐	☑	
Certificazioni o altre evidenze tecniche, se disponibili *Certifications or other technical evidence, if available*	☐	☑	
Informazioni relative all'identificazione / etichettatura dell'imballaggio *Information concerning packaging identification / labelling*	☐	☑	
Altra documentazione tecnica pertinente *Other relevant technical documentation*	☐	☑	

3. VERIFICA DOCUMENTALE / *DOCUMENT REVIEW*

Esito / *Outcome:*

☑ Documentazione adeguata ai requisiti applicabili / *Documentation adequate for applicable requirements*

☐ Documentazione da integrare / *Documentation to be supplemented*

☐ In attesa di documentazione dal fornitore / *Awaiting supplier documentation*

Eventuali note / integrazioni richieste / *Notes / additional documentation required:*

2. Description and identification of the product

Article No.	Article Description	Country of origin
170130	Dosing bottle 250/25ml 1N 28TE HDPE natural	Germany (DE)

3. Material overview

The DoC is valid for the above-mentioned item and consists of the following material types:

Material type	YES	NO	N/A
Raw material	☑	☐	☐
Masterbatch	☐	☑	☐
Additive(s)	☐	☑	☐
Liner*	☐	☐	☑

*If stated "No", please see separate liner DoC.

4. General

The packaging user is not released by this Declaration of Compliance from his obligation to comply with the requirements within his area of responsibility. We hereby confirm that this product complies with the Regulations, Directives and Laws as described below:

No.	Description	Date of enforcement
☑ 1935/2004	Regulation (EU) on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC	27 October 2004
☑ 2023/2006	Regulation (EU) on good manufacturing practice for materials and articles intended to come into contact with food [incl. latest amendments]	22 December 2006
☑ 10/2011	Regulation (EU) on plastic materials and articles intended to come into contact with food [incl. latest amendments]	14 January 2011
☐ 1616/2022 (if applicable)	Regulation (EU) on recycled plastic materials and articles intended to come into contact with foods, repealing Regulation (EU) No 282/2008 [incl. latest amendments]. [RIN/RON No.:] *Notes: Further details see converter DoC [incl. latest amendments]*	15 September 2022
☑ 2024/3190	Regulation (EU) on the use of bisphenol A (BPA) and other bisphenols and bisphenol derivatives with harmonized classification for specific hazardous properties in certain materials and articles intended to come into contact with food, amending Regulation (EU) No 10/2011 and repealing Regulation (EU) 2018/213 [incl. latest amendments]	19 December 2024
☑ 2025/40, Art. 5, (4) and (5)	Regulation (EU) on packaging and packaging waste, amending Regulation (EU) 2019/1020 and Directive (EU) 2019/904, and repealing Directive 94/62/EC [incl. latest amendments]	19 December 2024

5. Specification of use

The global migration as well as the specific migrations are below the legal limits when used according to the specifications. The tests were carried out in accordance with the actual valid Regulation (EU) No. 10/2011.

5.1 Intended type(s) of food(s)

Type of food
☑ All types of food
☐ Liquids with a pH > 4.5 and ethanol % of max 10%
☐ Liquids with a pH < 4.5
☐ Liquids up to 20% ethanol
☐ Liquids (incl. fatty liquids like milk etc.) w/o ethanol up to 50%
☐ Oily products (sauces, butter, oils etc.)
☐ Dry food e.g. supplements or powders

5.2 Specifications for use as regards of time and temperature of treatment and storage of food

OML	Type of food	Test condition
☐ OML0	Any food contact at cold or ambient temperatures and for a short duration (≤ 30 minutes)	30min at 40 °C
☐ OML1	Any food contact at frozen and refrigerated conditions	10d at 20 °C
☑ OML2	Any long-term storage at room temperature or below, including when packaged under hot-fill conditions, and/or heating up to a temperature T where 70 °C ≤ T ≤ 100 °C for a maximum of $t = 120/2^{((T-70)/10)}$ minutes	10d at 40 °C
☐ OML3	Any food contact conditions that include hot-fill and/or heating up to a temperature T where 70 °C ≤ T ≤ 100 °C for maximum of $t = 120/2^{((T-70)/10)}$ minutes, which are not followed by long-term room temperature or refrigerated storage	2h at 70 °C
☐ OML4	High temperature applications for all types of food at temperatures up to 100 °C	1h at 100 °C or at reflux
☐ OML5	High temperature applications up to 121 °C	2h at 100 °C or at reflux or 1h at 121 °C
☐ OML6	Any food contact conditions at a temperature exceeding 40 °C, and with foods for which point 4 of Annex III assigns simulants A, B, C or D1	4h at 100 °C or at reflux
☐ OML7	High temperature applications with fatty foods exceeding the conditions of OML5	2h at 175 °C

5.3 Surface/Volume ratio

The following surface/volume ratio had been tested: 6 dm²/kg

6. Condition of use

The product is safe to use with this packaging under the conditions below, with all substance migration remaining within Regulation (EU) 10/2011 limits.

6.1 Overall migration (OML)

This product complies with the overall migration limit tested using the following simulants:

Simulant(s)	Description
☑ A	Ethanol 10 % (v/v)
☑ B	Acetic acid 3 % (w/v)
☐ C	Ethanol 20 % (v/v)
☐ D1	Ethanol 50 % (v/v)
☑ D2	Vegetable oil (1)
☐ E	Poly (2,6-diphenyl-p-phenylene oxide) / Tenax

Testing with simulants A-B-D2, B-C-D2 or B-D1-D2 represents suitability for all types of food.

6.2 Functional Barrier

☑ This product does not contain a functional barrier

☐ This product contains a functional barrier

6.3 Non-intentionally added substances (NIAS)

Non-intentionally added substances (NIAS) are chemicals that are present in a food contact material (FCM) or food contact article (FCA) but have not been added for a technical reason during the production process. NIAS in plastic, according to Regulation (EU) No. 10/2011 and in non-plastic materials, are risk assessed in accordance with Regulation (EU) 1935/2004.

☐ This product does not contain NIAS (According to the manufacturer's documentation)

☑ This product contains NIAS which are listed in the table below (Based on NIAS Screening)

☐ This product contains NIAS which are listed in the table below (Based on material documentation)

CAS No.	Substance name	SML [mg/kg]
	C14-C36 (suml)	28
	Fatty acid ester	<60
	polyamid-6-Oligomer n=2	<5
	tris(2,4-ditert-butyphenyl)phosphit (Irgafos 168)	<60
	tris(2,4-di-ten-butylphenyl)phosphate (Oxidationsprodukt von Irgafos 168)	<60

6.4 Specific migration (SML)

☐ This product does not contain SML substances (based on material documentation)

☑ This product contains SML substances which are listed in the table below (Based on laboratory analysis)

☐ This product contains SML substances which are listed in the table below (Based on calculation model)

For the investigated product all contained substances with a specific migration limit (SML) laid down in the Annexes I and II to the Regulation (EU) No. 10/2011 were compiled (based on the datasheets relevant for food-contact of all used materials) and the compliance with the limit values ascertained by analyses, calculations, or any other plausible way. As a conclusion this product may contain the substances mentioned in the table below:

FCM No.*	CAS No.	Substance name	SML [mg/kg]
141	0000077-99-6	1,1,1-trimethylolpropane	6
356	0000592-41-6	1-hexene	3
433	0002082-79-3	octadecyl-3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate	6
483	0004724-48-5	n-octylphosphonic acid	0.05
Al	-	Aluminum	1
As	-	Arsenic	ND
Ba	-	Barium	1
Ca	-	Calcium	-
Cd	-	Cadmium	0.002
Co	-	Cobalt	0.05
Cr	-	Chromium	ND
Cu	-	Copper	5
Eu	-	Europium	0.05
Fe	-	Iron	48
Gd	-	Gadolinium	0.05
Hg	-	Mercury	ND
K	-	Potassium	-
La	-	Lanthanum	0.05
Li	-	Lithium	0.6
Mg	-	Magnesium	-
Mn	-	Manganese	0.6
Na	-	Sodium	-
Ni	-	Nickel	0.02
Pb	-	Lead	ND
Sb	-	Antimony	0.04
Tb	-	Terbium	0.05
Zn	-	Zinc	5

*In case of a metal substance, the chemical symbol is indicated here.

6.5 Dual-Use-additives

☑ The product does not contain dual-use-additives

☐ The product does contain dual-use-additives, listed in the table below

E-No. / FL-No.	Name

Disclaimer

This Declaration of Compliance is based on the results of defined material combinations and the corresponding assessment. The distribution company confirms that routine production is carried out in accordance with this sampling. This document applies exclusively to the food types and specifications of use listed above. The distributing company cannot take responsibility for additional food categories or application conditions (e.g., duration, temperature) that may result in unforeseen interactions with the article and consequently compromise its compliance. Where necessary, a renewed compliance assessment must be conducted. Our documentation consistently refers to the applicable base regulation. Should an amending regulation or any related revision affect our Declaration of Compliance or materials in use, we will proactively notify our customers. Ensuring that the filling material is suitable for the intended use remains the sole responsibility of the customer. This document becomes invalid if the product is modified in any manner without our prior written approval. Further information is available on request.

5. Validity

This document remains valid until you are proactively informed by us of a change. Even if the date of a regulation in its most recent version is after the date of this document and you have not been informed by us of a change, it can be assumed that the product still complies with the requirements even without an updated version of this document.

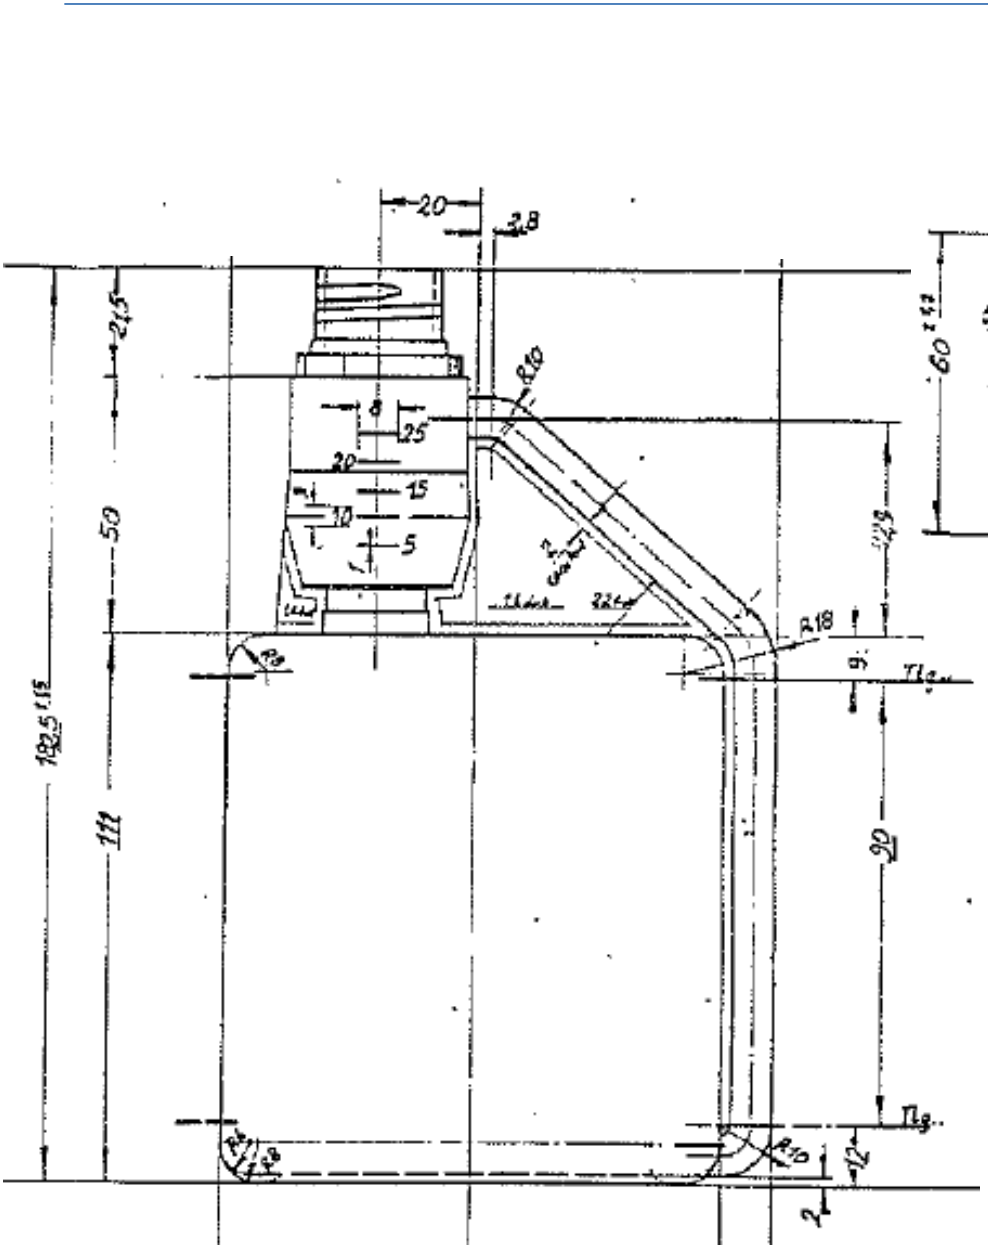

6. Disclaimer

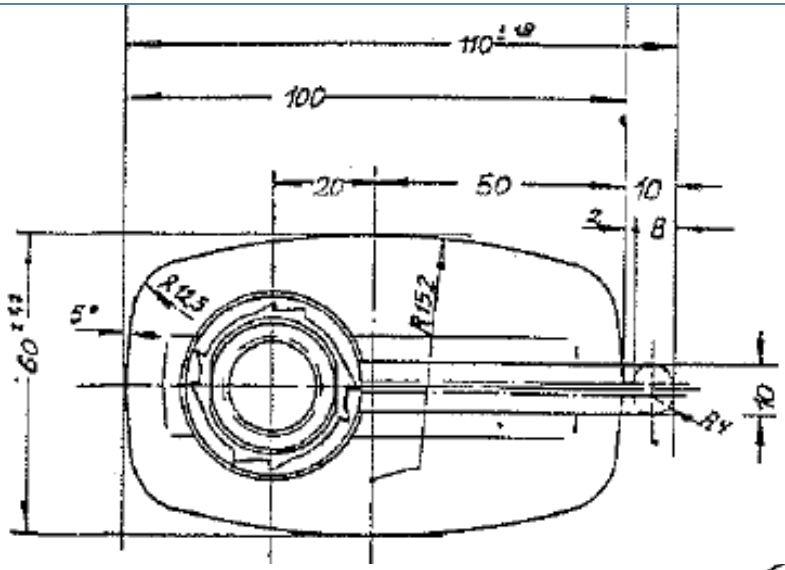

We pass on the information to the best of our knowledge - based on the information provided by our suppliers. The information applies to the product mentioned. We assume that the information is correct and reliable. We recommend carrying out your own investigations to check whether the products are suitable for your applications.

Dosing bottle 1 neck – 500 ml – 25 ml

Article number	170145, 170305	**Quantity/pallet**	1800 pcs
Nominal capacity	500 ml; 25 ml	**Pallet weight**	120 kg
Brimful capacity	500 ml; 25 ml	**Pallet size** (l w h)	120*80*230cm
Material	HDPE	**Kinds of layers**	carton boxes
Weight	50 ± 2 gr.	**Number of layers**	
Closure	TE 28 mm	**Other**	
Colour	natural, fluorinated	**Revision date**	30/10/2020

July 26

In this document we would like to inform you on the recycling categories of the items you buy from us. This information is based on current available public information, RecyClass EU recycling guidelines and information provided to us by our supplier base and is subject to change.

1. Recyclability of a product

The recyclability of a product needs to be evaluated for the entire final package as placed on the market. This includes all packaging components such as closures, liners, labels, sleeves, printed ink, decoration etc. At Pont, we can only give information on the recyclability of the packaging materials we supply (empty jars and bottles with accessories) and not on the final product.

To answer the question if an item is recyclable, we need to look at the ability of correct sorting, detection and separation of different components, and the existence of an appropriate recycling stream. Unfortunately, in most cases the answer will not be a simple yes or no. Please note, the information below is based on EU guidelines and local differences in recycling infrastructure can occur.

2. Recyclability Guidelines

The EU will set recycling criteria and categories to comply with the Packaging and Packaging Waste Regulation (PPWR). The categories will be defined by a grade and a recycling percentage: A, B or C. Requirements and criteria will be published by 2028, implementation starts on January 1, 2030.

Items not belonging to one of these three categories are not recyclable (recycling percentage less than 70% recyclable). We have categorized these items with F. This is just an indication, these items are still allowed on the market, until 2030. Awaiting the final EU categories, we have defined the below three groups.

3. Table of recycling categories

Group	Meaning	Material
A	Item is fully recyclable	• PE, rPE, biobased PE natural or white, incl. closures without liners • PE, rPE, biobased PE fluorinated natural • PP and rPP natural or white, incl. closures without liners • PET and rPET transparent or light blue and white opaque or cream white • PS natural or white, incl. closures without liners • Metal cans any colour, metal closures any colour without liners • Glass clear, white flint, amber, green • Mono-PE and Mono-PP structured pouches
C	Item is limited recyclable	• PE, rPE and biobased PE coloured (other than natural or white) and carbon black free, incl. closures without liners • PP, rPP and biobased PP coloured (other than natural or white) and carbon black free, incl. closures without liners • PET and rPET transparent colours (other than light blue) carbon black free • PS coloured (other than natural or white) and carbon black free incl. closures without liners

		• Glass blue • UV stabilizers • PE /PP items < 50 mm • Items > 10 liter
F	Item is not recyclable	• PE, rPE and biobased PE dark coloured and black with carbon black, metallic incl. closures • PP, rPP and biobased PP dark coloured and black with carbon black, metallic incl. closures • PET dark coloured with carbon black, black and metallic • PET items < 40 mm • PE / PP items < 20 mm • PS foamed XPS, EPS and dark coloured with carbon black • Urea closures • Closures with liners that cannot be removed • Stoneware, ceramics • Assembled items with multiple materials (aeroflow taps, pipettes, pumps etc.) • Multilayer, multi-material structured pouches

4. Material specification

Plastics
We supply packaging materials made from HDPE/LDPE (PE), PET and PP. These materials are so called mono-polymer materials which in general are technically recyclable, in the current mechanical recycling systems, taking into account, among others, colour and size. These plastic materials (resins) are identified and separated from each other by using a near infra-red detection system. Each material will be detected and further processed in a separate stream.

Glass
Glass bottles and jars are 100% recyclable in many colours and can be recycled indefinitely without losing the original quality and property. Glass is mostly separately disposed and recycled in clear (flint), green and brown. The decoration of glass can influence the recyclability.
The average recycled content in our glass containers is 30% for white flint and 45% for amber glass.

Metal
Some items we supply are made of aluminium or tinplate. Metal is good to separate from the other materials by the magnetic device used.

Fiber based
Our fiber based closures are 100% recyclable in the paper waste stream.

PS containers and closures
In some EU countries PS rigid plastic is used for yoghurt pots and other food and beverage products. There is an existing post-consumer recycling stream available, except for XPS and EPS.

Closures with liner
Most closures have liners which traditionally have been composed of two or more different materials (multilayer) to meet requirements such as tamper evidence or seal performance. Per definition these multilayer liners are not recyclable. If the liner is removed before disposal of the packaging and if a part of the liner is not remaining inside the closure, the closure may be recyclable. More sustainable liner solutions are being worked on. In the below item list we evaluate the closure taking into account the liner is removed from the closure.

CBF – carbon black free (colouring)
Traditional carbon black pigments for colouring, which are used in many colours, disturb the detection of recyclable packaging materials such as PE, PP or PET during the recycling process. Using Carbon Black Free (CBF) pigments help the packaging materials to be recognized and ensures that these materials can be recycled into new products.

White opaque or cream white PET packaging
According to the latest RecyClass update, white opaque PET packaging is now classified as fully recyclable, provided that the L-value ≥ 85 to ensure sufficient lightness of the material and a titanium dioxide (TiO_2) content < 8% to maintain compatibility with established PET recycling streams.

Pouches
The pouch design determines the recycling category classification. Pouches with multi-layer laminates, combining plastics, aluminium, or incompatible polymers need to be avoided. Mono-PE and Mono-PP constructions are widely mechanically recyclable.

5. List of items and information of recyclability

Item code Pont	Item description	Customer reference	Category*
270100	Bung small EVA with hole	AQ51102080	C
270031	Closure TE 28mm PP EPE white 2mm	AQ51102070	C
170130	Dosing bottle 250/25ml 1N 28TE HDPE natural	AQ51102050	A
170145	Dosing bottle 500/25ml 1N 28TE HDPE natural	AQ51102060	A

*explanation on categories – see above point 3

If you have any questions regarding the information above or how to improve the recyclability of your packaging, please ask your direct contact person. We would like to take the opportunity to thank you for the business relationship and remain with best regards.

Disclaimer
This statement is based on public information, the RecyClass recycling guidelines and input received from our supplier base. Due to the rapid evolution of sustainability into the packaging sector as well as local differences of recycling processes and laws, information provided within this document are for information only. Tests by EU certified institutes need to be done to proof the recyclability of the final product in line with the EU Design for Recycling guidelines. Any change in the recycling process, law or related conditions, might influence the practical recyclability of the product. This document is, therefore, valid as long as no change in the above parameters or the relevant legislation occurs.

Conclusion	***YES***	***NO***	***NOT APPLICABLE***
This product meets the requirements of above-mentioned legislation	☑	☐	☐

5. Validity

This document remains valid until you are proactively informed by us of a change. Even if the date of a regulation in its most recent version is after the date of this document and you have not been informed by us of a change, it can be assumed that the product still complies with the requirements even without an updated version of this document.

6. Disclaimer

We pass on the information to the best of our knowledge - based on the information provided by our suppliers. The information applies to the product mentioned. We assume that the information is correct and reliable. We recommend carrying out your own investigations to check whether the products are suitable for your applications.

This document was generated electronically and is valid without signature
Date of issue: 28 July 2026

Gentile Cliente,

La ringraziamo per la sua recente richiesta di informazioni in merito allo stato di conformità normativa dei prodotti menzionati nell'oggetto di questa lettera.

Le sostanze classificabili come PFAS, secondo la definizione OCSE, non sono aggiunte intenzionalmente come ingrediente nella fabbricazione dei prodotti menzionati nell'oggetto di questa lettera e non si prevede che siano presenti nella composizione del prodotto finale. Qualora una qualsiasi di queste sostanze fosse presente, lo sarebbe solo a livello di tracce. Salvo diversa indicazione esplicita, non sono stati condotti test per determinare la presenza delle sostanze sopra menzionate. I prodotti sono venduti con l'esplicita esigenza e consapevolezza che il cliente è il solo ed esclusivo responsabile dei test e di garantire che il prodotto (nel suo complesso e nelle sue componenti) sia conforme all'uso previsto e alle specifiche caratteristiche desiderate. Inoltre, con il continuo sviluppo di strumenti e protocolli analitici, potrebbe essere che sostanze non rilevabili oggi possano esserlo domani. Si declina ogni garanzia, espressa o implicita, di commerciabilità, idoneità per un uso particolare e presenza di determinate sostanze.

Le informazioni divulgate e a cui si fa riferimento sopra sono fornite al meglio delle nostre conoscenze, sulla base delle informazioni fornite dai fornitori di materie prime e componenti pertinenti. Riteniamo che queste informazioni siano accurate e siano fornite in buona fede. Queste informazioni sono soggette a revisione in caso di acquisizione di ulteriori conoscenze/informazioni. Salvo diversa indicazione, le informazioni divulgate sopra escludono lo stato di conformità normativa del materiale del liner distaccante, poiché questo è generalmente considerato rimosso prima dell'applicazione.

Cordiali saluti

Emilabel s.r.l – *Etichette autoadesive in bobina e modulo continuo*
Via Venezia, n° 34 41016 Novi di Modena (MO) – Tel. 059 652520 – Fax. 059 682260 – E-mail: segreteria@emilabel.it
C.f. – P.iva 01551690363 – R.E.A. MO nr. 225090 – Reg. Imp. MO nr. 01551690363 – Cap. Soc. 10.400,00 i.v.

Oggetto: Conformità delle etichette fornite ai requisiti del Regolamento (UE) 2025/40 sugli imballaggi e i rifiuti di imballaggio (PPWR)

Spett.le Cliente,

con la presente, **Emilabel s.r.l.** con sede in **v. Venezia 34, 41016 Novi di Modena -MO-**, in qualità di produttore e fornitore di etichette autoadesive destinate all'applicazione su imballaggi secondari, dichiara:
Le etichette da noi prodotte sono realizzate utilizzando materiali, supporti, adesivi, inchiostri e coloranti acquistati da fornitori qualificati che hanno fornito specifiche dichiarazioni, certificazioni e documentazione tecnica attestanti la conformità dei propri prodotti ai requisiti normativi applicabili. La suddetta dichiarazione è valida per il packaging che esclude il contatto diretto con l'alimento.
La documentazione inerente alle analisi di laboratorio sarà resa disponibile agli organi di controllo.
Sulla base della documentazione da noi in possesso, le etichette fornite sono realizzate con materiali per i quali i fornitori hanno dichiarato la conformità ai requisiti applicabili del Regolamento (UE) 2025/40
relativamente ai materiali costituenti l'etichetta.
Per quanto concerne lo smaltimento, Vi chiediamo di prendere visione dell'allegato *"etichettatura ambientale"*.
La presente dichiarazione non costituisce attestazione di conformità dell'imballaggio finale né della sua riciclabilità complessiva, che dipendono dalla configurazione completa dell'imballaggio e dalle modalità di applicazione dell'etichetta. Resta inteso che la verifica della conformità dell'imballaggio finito, del sistema di confezionamento completo e dell'immissione sul mercato del prodotto finale rimane in capo al soggetto responsabile della progettazione, assemblaggio e commercializzazione dell'imballaggio stesso, secondo quanto previsto dalla normativa vigente. La documentazione tecnica e le dichiarazioni dei fornitori sono conservate presso i nostri e rese disponibili alle autorità competenti nei casi previsti dalla legge.
La presente dichiarazione ha validità a partire dal **12 agosto 2026** e rimane valida fino a eventuali modifiche normative, variazioni delle materie prime utilizzate o aggiornamenti della documentazione ricevuta dai fornitori.

Cordiali Saluti.

Heavy Metal Content (CONEG and Directive (EU) 2018/852 amending Regolation 40/2025

Label and Packaging Materials & Graphics Solutions products comply with
the Packaging and Packaging Waste Directive 94/62/EC, up to and including amendment (EU) 2018/852, and the US CONEG Model Toxics Legislation in relation to the various heavy metals paragraphs. The requirement imposed by these pieces of legislation for heavy metals is that the sum
of cadmium, mercury, lead and chromium (VI) in products is below 100 ppm.

Presenza metalli pesanti (CONEG and Directive (EU) 2018/852 amending Regolation 40/2025

I prodotti forniti Label and Packaging Materials & Graphics Solutions sono conformi alla Direttiva sugli imballaggi e i rifiuti di imballaggio 94/62/CE, fino all'emendamento (UE) 2018/852 incluso, e alla normativa modello statunitense CONEG sulle sostanze tossiche in relazione ai vari paragrafi sui metalli pesanti. Il requisito imposto da queste normative per i metalli pesanti è che la somma di cadmio, mercurio, piombo e cromo (VI) nei prodotti sia inferiore a 100 ppm.
